

COMMUNITY PARK REDEVELOPMENT

As part of the Shire of Wongan-Ballidu's Community Strategic Plan and long-term planning for our community, it was identified in 2021 through community consultation, the need to redevelop the community park.

The need to update and renovate the park has been acknowledged by Council and we are currently working together with the community and the consultant towards a plan of redevelopment. We have engaged the services of Emerge Associates to assist in the design and consultation of the redevelopment of the Community Park.

We are looking for community input and feedback on what the community want their park to look like. The community's input is imperative to a successful redevelopment and we look forward to working with community to bring the vision to life.

Community Consultation Part 1 - A working group and users of the park who are passionate about the redevelopment have met with Shire staff and the consultants to discuss ideas and what the concept design could look like. This process saw priorities highlighted and "must haves" for the redevelopment identified.

Community Consultation Part 2 -Please spare a few minutes to complete our survey and provide your input into the Community Park Redevelopment. Your opinion matters!
